DETAILED ACTION

In response to the amendment filled on 12/14/2004, all the amendments to the claims have been entered and the action follows:

Allowable Subject Matter

- 1. Claims 1, 4-22, 24-49, and 51 (renumbered as 1-47) are allowed.
- The following is an examiner's statement of reasons for allowance:
 Claims 1, 19, 48 and 49 with their respective dependent claims are allowed because

prior art alone or in combination with fails to disclose or suggest a method of inspecting a continuously moving web that includes a digital data stream corresponding to each sequential portion describes pixels in an X domain corresponding to their position across the web, binarizing digital data stream, forming a blob list from the data stream by determining collections of pixels connected to each other in the X domain so as to define segments and resolving line to line whether connections exist between segments in a Y domain corresponding to the direction of web movement, in combination to the other elements of the claim.

Claim 5 is allowed because prior art alone or in combination with fails to disclose or suggest a method of imaging and comparing a portion of a continuously moving web

Application/Control Number: 09/781,372

Art Unit: 2623

that includes binarizing the digital data steam prior to forming the blob list, the binarizing comprising, identifying at least one sequential portion having substantially the entire range of optical properties characteristics of the web, identifying the pixel values corresponding to local maxima and minima, defining a range bounded by the lowest value among the pixel values identified as local maxima and the highest value among the pixel values identified as local minima, calculating a threshold value within the range in combination to the other elements of the claim.

Claims 20, 36 and 42 with their respective dependent claims are allowed because prior art alone or in combination with fails to disclose or suggest a method of inspecting a continuously moving web having a repeating pattern that includes calculating information on the lengths of collections of pixels connected to each other in a Y domain corresponding to the direction of web movement, modifying the lengths of the collections of pixels in at least one of the X domain, the Y domain, or both domains, by a first determined number, preparing a new blob list based on the modified lengths, and comparing the number of blobs on the new blob list against a second determined number, in combination to the other elements of the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vikkram Bali whose telephone number is 571.272.7415. The examiner can normally be reached on 7:00 AM - 3:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Amelia Au can be reached on 571.272.7414. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
